

Please Consider a Donation to Support PPI Educational Activities

Your donation in any amount will support the efforts of **Paradise Permaculture Institute** in the areas of transformational education, positive environmental change, organic agriculture, honoring biodiversity, creating self resiliency in food & energy supply, and empowering a new generation of cultural workers, designers, and teachers. Any surplus funds raised will go to the scholarship fund for future students to apply for grants for developing a permaculture garden in their neighborhood for the greening of our community.

*Please make a donation of
whatever amount you choose.*

Paradise Permaculture Institute
is a Montana Nonprofit
Corporation that serves community
and beyond through education,
demonstration and implementing
sustainable design. We provide
information, networking and news
as well as organize classes &
workshops on sustainability-
related subjects and projects.

Paradise Permaculture Institute

“We are only truly secure when
we can look out our kitchen
window and see our food growing
and our friends working nearby.”

*Bill Mollison, Founder of
Permaculture*

**Learn. Plant.
Thrive!**

Take part in classes, workshops, training, projects, and building community!

Learn about:

- water use, irrigation, ponds
- earthworks
- building soil, composting
- increasing vegetable & crop productivity
- property & garden design that works with nature
- food forests, growing mushrooms
- orchards
- polycultures, plant companions
- energy-efficient greenhouses
- beneficial weeds
- sustainable buildings
- medicinal herbs
- and MORE!

PPI also offers consulting & site design services.

What is Permaculture?

Originally described by the words “permanent agriculture,” it is the practice of using ecological design principles to work with, rather than against nature, to create edible landscapes, efficient shelters and meet our energy needs.

This philosophy creates diversity, stability and resilience in our agricultural systems. Learn to apply these strategies to your backyard, your farm or your community.

The permaculture principles stem from a set of ethics: caring for Earth, caring for each other, and reinvesting the surplus that this care will create.

Our Mission:

We demonstrate how to work with nature to co-create abundant foodscapes and sacred spaces.

Our Vision:

People everywhere are restoring the natural balance of the Earth. Thousands of families and communities have successfully and profitably transitioned to regenerative agriculture.
